

file.status()

This method returns the current file status code.

Return Value

A Number value set to the status code resulting from the most recent operation on the file.

Examples

Retrieve file status code

```
myfile.getRecord(100);  
if (myfile.status() === 12) // Record not found  
  doSomething();
```

RPG Equivalent

%STATUS(file_name)

Requirements

This API requires the [Profound.js Connector](#) module.
