

# Toolbar Items

## Adding a Toolbar Item

The Toolbar Items panel is displayed on the Navigation tab directly below the Navigation Items panel. To add an item to the toolbar, select the toolbar folder and click add.

## Adding a Button

To add a button to the toolbar, select the Button option in the Add dropdown list. The Button Item Details will be displayed. Update the button name, action type and other fields as desired and click Update.

Item Details	
Item number:	115
Item type:	Button
Item name:	<input type="text" value="My Company"/>
Action type:	<input type="text" value="Web Application"/> ▼
URL:	<input type="text" value="www.profoundlogic.com"/>
Open as:	<input type="text" value="A tab in the portal"/> ▼
Opens once only:	<input type="checkbox"/>
Icon:	<input type="text"/>
<input type="button" value="Update"/>	

## Adding a New Pull-down Menu

To add a pulldown menu to the toolbar, select the Pulldown Menu option in the Add dropdown list. Update the item name and various fields as desired and click update. You may add pulldown items to the new menu as well. In this example, we've named our new Pulldown Menu "Development Team" and added two items to the menu.

The screenshot shows the 'Genie Macros' interface with the 'Navigation' tab selected. On the left, a tree view shows the 'Toolbar' folder containing 'My Company', 'Development Team', 'Testing', and 'Deployment'. The 'Development Team' item is selected. The main panel displays 'Item Details' for item number 119, which is a 'Pulldown Menu' with the name 'Development Team'. An 'Update' button is visible at the bottom of the details panel.

## Adding a Separator Bar

To add a separator bar to the toolbar first select the Toolbar folder and click the add button. Select the Separator Bar option in the dropdown list. The new separator will be displayed in the list of Toolbar Items. You may select the separator and drag to the desired location to add a line of separation between two items.

The screenshot shows the 'Genie Macros' interface with the 'Navigation' tab selected. The 'Toolbar Items' list is expanded, showing a tree view where a 'Separator Bar' (represented by a blue dot) has been added between 'My Company' and 'Development Team'. The 'Add' and 'Delete' buttons are visible above the list.

Exit the control panel by clicking the "X" in the upper right hand corner. All of the items we've covered in the previous instructions are shown. You'll notice the separator bar has been placed between My Company and Development Team as we specified in the toolbar settings.

Follow the same steps (listed above) to add a spacer or fill item to your toolbar. A spacer item, as the name suggests, adds a space between two items. A fill item fills the toolbar with spaces until it reaches the very end. A fill item is appropriate when rendering items on both, left most and right most, sides of the toolbar is desired.
