

Date Field

Overview

The date field is a standard [textbox](#) widget with a date picker positioned next to the input field. The date picker allows you to select a date to be placed within the textbox.

Validation (Rich UI Only)

Please visit the [Validation and Error Messages](#) page.

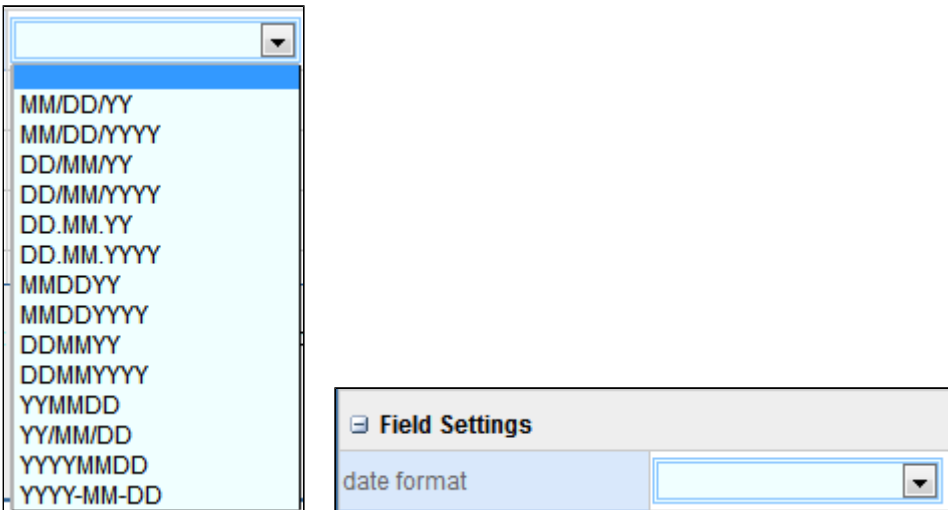

Field Binding Dialog (Rich UI Only)

Please visit the [Field Binding](#) page.

Date Formatting Properties

Date Format Property - This property is used to set a specific format of a date field widget. **(Genie Only)**

This property can also be defined for all date fields in Genie by the default date format setting in the [Genie Administrator](#). If no date is specified the default date format of 'MM/DD/YY' will be used.

In a Rich UI application the date format can be set by opening the binding dialog and selecting the Date field formatting. The date can be set from multiple formats or certain locales. **(Rich UI Only)**

Date1 - Bind Value to a Program Field

Field Name	Data Type	Length
Field0001	Character	10

Field Formatting

Field Formatting	Date Format
Text	Default
Number	2018-01-15
Indicator	01/15/18
Date	01/15/2018
Time	1/15/18
Time Stamp	1/15/2018
Special	
Custom	

Locale: English (United States)

Date Pattern:

OK Cancel Keywords...

The default date used in a Rich UI application can be set as well using the [Default Date Format](#) configuration option. If no option is set from the binding dialog or by using the configuration option the default 'MM/DD/YY' will be used.
