

Filter Option

Presents an option to filter grid data when the grid heading is right-clicked.

Promptable? DROPDOWN

Possible Values: true,false

Bindable? YES

Products: ProfoundUI

Filtering Expressions

The following is a list of possible filtering expressions that you can use when filtering a column:

- *xyz* - searches for all data containing 'xyz'
- *between aaa and zzz* - searches for alphanumeric values between 'aaa' and 'zzz'
- *between 10 and 20* - searches for numeric values between 10 and 20
- *starts with xyz* - searches for all data that starts with 'xyz'
- *values A, B, C, etc.* - searches for a list of values (exact matches)
- *=xyz* - searches for data equal exactly to 'xyz'
- *>123* - greater than search
- *>=123* - greater or equal to search
- *<123* - less than search
- *<=123* - less than or equal to search
- *!=xyz* - searches for alphanumeric values that do not contain 'xyz'
- *!=123* - searches for numeric values that are not equal to 123

 As of version 6.9.1, blanks can now be filtered, and are represented by a single space. Valid expressions include: " ", "= ", "== ", and "values A, ,B"
