

Database Fields

A set of database field names to use to retrieve the data for a database-driven grid. The field names should be comma separated.

Promptable? YES

Possible Values: Any valid database fields

Bindable? YES

Products: ProfoundUI, Genie

Field names and expressions may be used.

Example:

You may select columns using the column picker, or you may enter comma separated values. This example uses an expression for the 2nd column:

```
PNAME, PRID || ' _ ' || PCATID
```
