

connectorURL

This property specifies the URL of an IBM i-based instance of Profound.js that this instance will communicate with for the purpose of running Connector APIs that access IBM i data.

Examples:

Instance on "myIBMi" configured for SSL and default port 443

```
connectorURL: "https://myIBMi "
```

Instance on "myIBMi" running on port 8081

```
connectorURL: "http://myIBMi:8081 "
```

See also [Connecting to a Remote Instance](#) and `profoundjs.express()`.
