target directory

Defines the directory that uploaded files will be written to.

Promptable? NO
Possible Values: any valid IFS directory name
Bindable? YES
Products: ProfoundUI

All uploaded files will be placed in this directory. The user must have sufficient authority to write files into this directory.

Note: The directory is based off the root of the IFS, **not** the web server's document root. If you want to upload a file into the document root you will need to specify the full path:

For example: /www/profoundui/htdocs/profoundui/userdata/myfiles
