

overwrite files

Controls whether or not existing files will be overwritten when files of the same name are uploaded.

Promptable? NO

Possible Values: true/false

Bindable? YES

Products: ProfoundUI

When set to 'true', any existing files will be overwritten. When set to 'false' no files will be overwritten. If "generate unique names" is set to true, then the files will be saved with automatically generated unique names. Otherwise, an error will be returned when files already exist.
